

The SCORP'AIR ES range of low pressure lifting bags were designed for any operation requiring emergency cushions with large lifting capacity and greater stroke.

This range of low pressure lifting bags work at 1 bar and is available from 3 to 12 Tons lifting capacity.

SCORP'AIR ES constant lifting capacity and low thickness will be a great benefit to all relief operations for road, air and rail accidents, on building sites, or natural disasters, and with this on any type of soil.

Technical characteristics:

	Size (mm)		Working Pressure (Bar)	Lifting Capacity (Ton)	Volume (Litres)
	Diameter	Stroke			
SCORP'AIR ES 3T	610	430	1	2.98	134
SCORP'AIR ES 5T	760	590	1	4.63	285
SCORP'AIR ES 7T	910	610	1	6.63	423
SCORP'AIR ES 12T	1220	1000	1	11.92	1245

Accessories:

- Pressure Reducer
- Double Control Unit set at 1 Bar
- Connecting Hoses
- Transport Bag
