

The new range of SCORP'AIR 4S lifting bags designed by Scorpe Technologies combines several essential advantages in relief operations such as rescue excavation, road rescue, and any technical lifting operation.

SCORP'AIR 4S lifting bags offer many advantages: stability, great lifting capacity, low thickness for easy insertion in tight spaces, thin and rigid for easy storage, stackable and quick to use thanks to its ingenious connecting plate.

These Lifting Bags use a working pressure of up to 10 bar. They have an octagonal shape in order to have a maximum stroke and to retain a maximum strength.

Technical characteristics:

| | Scorp'Air 4S 25 T | Scorp'Air 4S 60 T | Scorp'Air 4S 137 T |
|-------------------------|----------------------|----------------------|-----------------------|
| Max Pressure | 10 Bar | 10 Bar | 10 Bar |
| Lifting Capacity | 25t | 60t | 137t |
| Max Stroke | 295mm | 480mm | 670mm |
| Max Air Volume | 282 Lt | 1086 Lt | 3800 Lt |
| Temperature Usage Range | - 20°C to + 55°C | - 20°C to + 55°C | - 20°C to + 55°C |
| Weight | 8 Kg | 18 Kg | 37 Kg |
| Diameter - Deflated | 560mm | 860mm | 1300mm |
| Safety Coefficient | ≥ 4 | ≥ 4 | ≥ 4 |

Accessories:

- Pressure Reducer
- Triple Control Unit (set at 10 bar)
- Shut Off Safety Valves
- Connecting Hoses
- Transport Bag
- Connecting Plates
