

Scorp' Air S lifting bags are the result of a long experience in the field of manufacturing cushions. This range, which have a working capacity of 8 Bar and up to 10 Bar, this 10 Bar operating pressure provides a 30% higher lifting force than the 8 Bar alternative range.

These cushions have been designed to be used by rescue teams. SCORP'AIR S Lifting Bags are **22 mm** thin for easy insertion in tight spaces and are reinforced with Kevlar fibres for a long lifespan and durability.

More over the non-slip surface of the bags allows to stack 2 bags to gain full lifting surface.

The cushions were redesigned with new accessories. They comply with the norm EN 13731 and are even more convenient to use.

Accessories:

Shut off / Safety Relief Unit (8 Bar) or (10 bar)

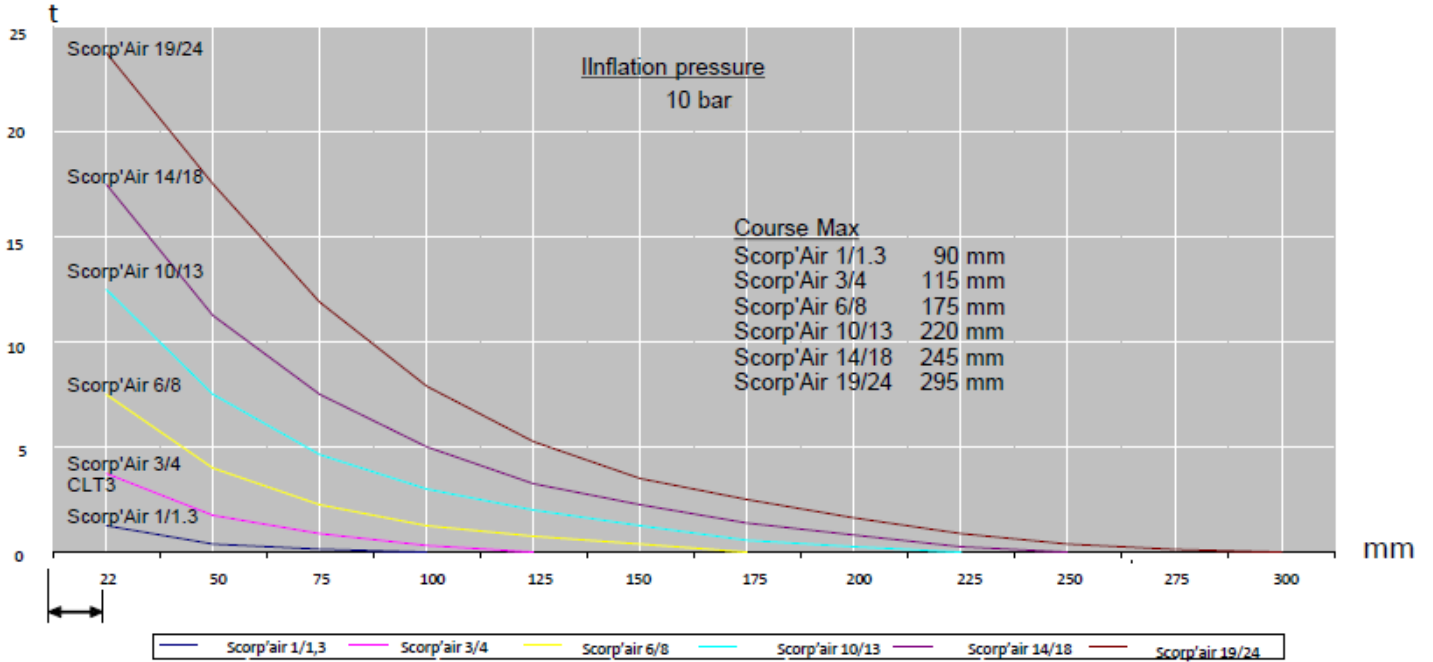

Inflation Hoses (5m) or (10m)
Green or Grey

Pressure Regulator (200 - 300 Bar)

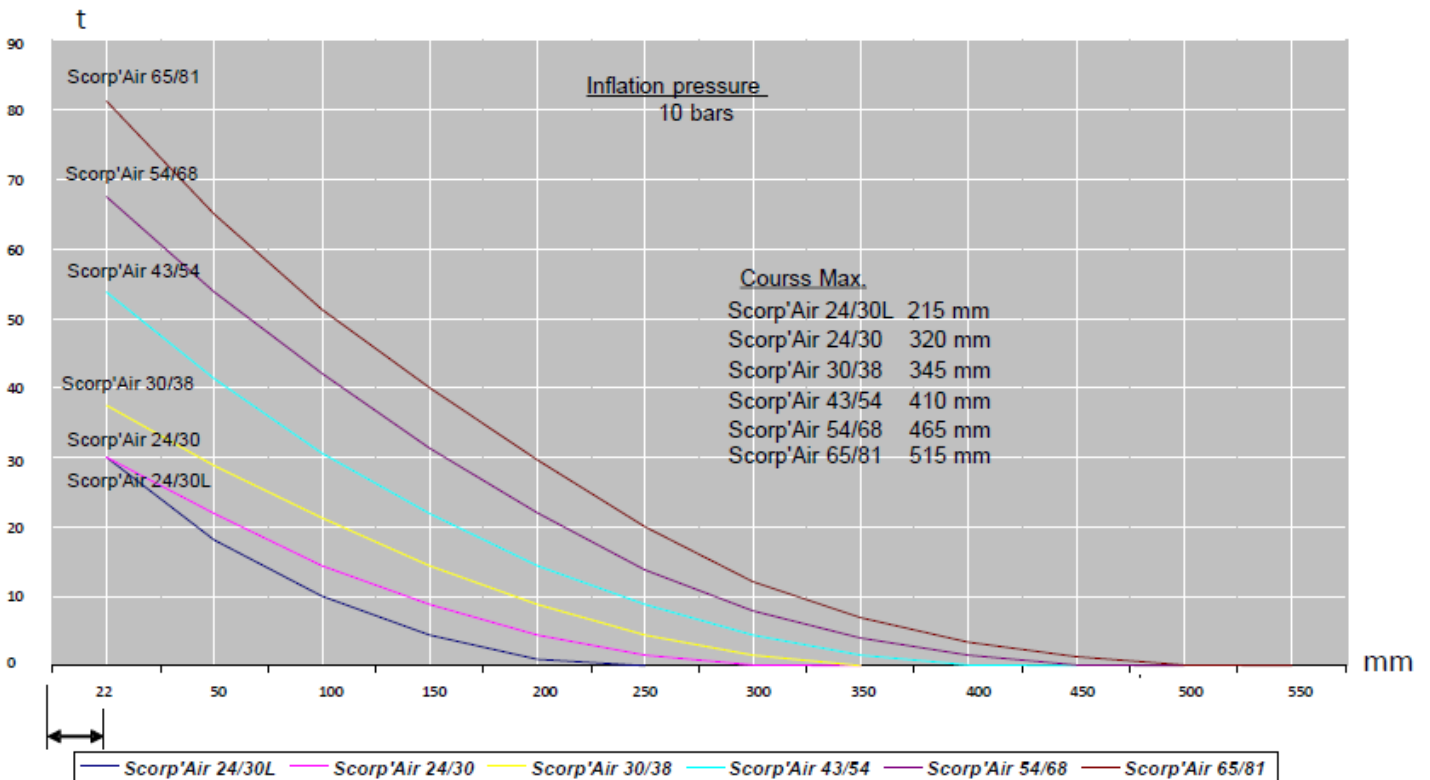

Deadman Controllers (8 Bar) or (10 Bar)

Lifting capacity
